EDUCATION

Jaypee Institute Of Information Technology

Noida, NCR

Bachelor's in Technology, Computer Science and Engineering

June 2018-Jun2022

- Published a research paper in I.E.E journal about an Intelligent Vision Board For Assisted Teaching using computer vision.
- Coursework: Software development fundamentals, Computer organisation and architecture, Operating Systems, Computer Networking, Artificial Intelligence, Machine Learning, Natural Language Processing, Big data.

EXPERIENCE

DocSphere (Clinic management application)

Software Developer (Freelance)

November 2024 – Present

- Created a cutting edge UI in flutter, ensuring an efficient and seamless experience of writing and sharing medical prescriptions.
- Used Supabase for user authentication
- Designed the database and Implemented Row Level Security using PostgreSQL.
- Created server-side TypeScript functions to listen to webhooks for user authentication and payment verifications.
- Integrated Razorpay for payment services.

DELOITTE USI. (Industry leader in delivering strategic insights and innovative solutions for businesses)

Analyst, Risk and Financial Advisory

June 2022 – Present

- Assisted in Human Capital Management (HCM) and Financial Supply Chain Management (FSCM) implementation involving several HCM and FSCM modules in Oracle Enterprise Resource Planning (ERP) Application Security, involved in fixing defects, supporting test cycles across several instances, and documentation.
- Collaborated with several teams of over 4 different work streams to fix bugs and come up with solutions based on client feedback.
- Automated the process of mass user access provisioning with python through data analysis and manipulation and Oracle Fusion REST APIs.

I AM IN (50+ employee Ed-tech startup)

Flutter Developer

March 2021 – September 2021

- Created over 16 episodes in flutter, comprising over 160 interactive user interfaces with animations and integrated to a backend.
- Used state rebuilder to manage state.
- Implemented code templates and refactored common UI widgets to increase development speed by over 30% and reduce errors
- Integrated Sentry to monitor crashes and bugs in app releases.
- Help integrate a referral system for partner companies.

PROJECTS

Amaclone (4/2023 - 7/2023): A full stack Amazone clone made using NodeJS, Flutter SDK, MongoDB Atlas and Cloudinary. Users can search for products, filter for categories, place orders and rate products. Sellers can update order stages, post products, view sales analytics and delete product postings

- App wide state managed using Provider.
- User authentication managed using JSON web token (jwt). Each request to the API is validated through user web tokens.
- Passwords encrypted using bcrypt to add security.
- Elegant, smooth UI optimised for performance with sleek animations.
- Implemented RESTful API using NodeJS and express to handle client requests, using middlewares for request authentication.

Health Monitor (2/2021 - 6/2021): A mobile application developed using Flutter SDK, Firebase Firestore and Arduino designed to measure a person's heart rate and oxygen saturation through a sensor and relay that data to Firestore.

- Integrated Firebase Firestore to store real time data about health vitals from the sensors along with a remark from the user.
- Pedometer functionality implemented using the phone's sensors to track total steps of the user.
- Featured sleek animations for a smooth and enhanced user experience

TECHNOLOGY STACK

Programming Languages: Dart, Python, Javascript, Typescript

Frontend: Flutter, HTML, CSS, React

Backend: NodeJS, FastAPI

Database: MySQL, MongoDB, PostgreSQL

Cloud Platforms: Firebase, AWS, Supabase

Additional Libraries:

- Python: Beautiful Soup, NumPy, Sci-Kit, Pandas, Keras, Tensorflow, TKinter, langchain, openAI API
- NodeJS: Express, bcrypt, jsonwebtoken
